The digit sum of the prime number p=679363 is ds(p)=34.

5*p=3396815 has the same digit sum, ds(5*p)=ds(p)=34.

** Mark in the prime sequence the primes p with ds(5*p)=ds(p). Discuss the result.

** Mark in the prime sequence the primes p with ds(f*p)=ds(p); $f \in \{2.3,4,6,7\}$. Discuss the result.
