In the debating club n°78

An advanced Samadhi Tank technology idea

Yesterday, my invisible droid Archimedes Pie (SP) trusted me with an interesting idea, an advanced Samadhi Tank (ST, Floating Tank, Isolation Tank) project: “Maybe I’m not the first having this idea, maybe I have Steve-stolen it, so I think it’s free for everybody’s access.”
“可以”, I answered him, “your idea is a little crazy, but I’ll publish it on the website ACDG.net, 为什么不.”

To understand his following proposal, inform you at first about ST.

[1] J.C. Lilly, E.J. Gold. Tanks for the Memories: Floatation Tank Talks.
Gateway Books and Tapes 2000

[2] M. Hutchison. The Book of Floating: Exploring the Private Sea.
Gateway Books and Tapes 2005
ISBN-10 0-89556-118-2

[3] http://en.wikipedia.org/wiki/Isolation_tank

[4] http://www.samadhitank.com

[5] http://www.floatation-tanks.co.uk

[6] J.C. Lilly. Programming and Metaprogramming in the Human Biocomputer: Theory and Experiments.
Float On 2014
ISBN-10: 0692217894

Now AP opened his think tank: “My goal is an advanced Samadhi Tank technology for highest and outstanding requirements in the fields of

* relaxation, stress alleviation, medical applications
* enhancement of creativity and problem solving ability.

Covering

single tank design (+ biofeedback, mental resonance effects, personal extreme experiences, etc.)
coupled tank design (+ brainstorming, ring of creative power, mental group experiences (resonance effects, acceleration effects, etc.), etc.).

All

basing on the newest scientific knowledge (psychology, neurosciences, bioinformatics, IT, control and automation) and
professionally equipped with the newest high-tech electronics (sensors, computer, actuators) + software and safety engineering.

A science, innovation, high-tech, high-quality oriented engineering project.
The potential clientele for such “Rolls Royce” ST are tycoons (yacht style), wealthy adventurers, top manager and businessmen, scientists, artists, writers.”

! Discuss this story written in Guilin 2015/10/30 to encourage Dr. Chen’s GUET students to “Stay hungry. Stay foolish.” critically.
